PILOT TRAINING / CHECK GRADE SHEET

TRAINING RECORDS EMAIL – MIATCTRAININGRECORDS@ATLASAIR.COM

Name of Pilot (last, first, mi)	Employee No.
Signature of Pilot	☐ CA ☐ FO *A/C Type* _____

EVENT

☐ PC ☐ UPRT/EET ☐ TO/LDG RECENCY (EXPIRED LDG)
☐ RFT ☐ TYPE RATING ☐ TO/LDG CURRENCY
☐ RLOFT ☐ CAT II / III ☐ 767 CFD CURRENCY
☐ QLOFT ☐ 767 LDS Diff. ☐ Other:_____

Certificate ☐ FAA Certificate	☐ Medical ☐ Jepp Pubs ☐ Manuals	
Simulator ID # /	☐ FCC Permit ☐ Photo ID	TO/LDG's *(3 Minimum)* /
Other Training Time (Hrs+Min)	PCWU Time (Hrs+Min)	PC / RFT / R-LOFT/QLOFT Time (Hrs+Min)

CATEGORY OF EVENT

☐ INITIAL ☐ REQUALIFICATION
☐ TRANSITION ☐ REFRESHER
☐ UPGRADE ☐ CONSOLIDATION
☐ RECURRENT ☐ ADMINISTRATIVE
☐ Special Tracking

PCWU/RFT/Type-Init PC Oral/LOFT/UPRT/EET/Other - Instructor/Ck Pilot/APD	Employee No.
Signature of Instructor / Ck Pilot / APD	Date (mm/dd/yy)
PC Check Pilot / APD	Employee No.
Signature of PC Check Pilot / APD	Date (mm/dd/yy)

RESULT

☐ SATISFACTORY / COMPLETE
☐ UNSAT / INCOMPLETE – REMOVED FROM FLIGHT STATUS
☐ INCOMPLETE – SIMULATOR MALFUNCTION OR ILLNESS

FAA Inspector/Examiner ☐ Observation ☐ Conduct Oral ☐ Conduct Type Rating

Name of Observing FAA Inspector / Examiner (Last, First, Mi)	FSDO
Signature of Observing FAA Inspector / Examiner	Date (mm/dd/yy)

INSTRUCTIONS

GENERAL:

- Complete appropriate fields and check boxes.
- **Pilot Signature –**Trainees are not required to sign in the Pilot Signature block.
- **Jepp Pubs, Manuals, FAA Certificate, Medical**- Mark the box after verifying Jeppesen publications and required manuals are current and all required reading has been completed. Verify FAA certificate and Medical.
- **English Proficiency**: - (PC Only) In the PC/RFT columns (Status), record an S – Satisfactory, or U – Unsatisfactory if ICAO level 4 proficiency is not demonstrated. English Proficiency is ascertained during both the briefing/oral and during the simulator evaluation (communication with other crewmember and ATC).
- **Takeoff and Landings** – Record all satisfactory takeoff and landings performed in every simulator session (E.g. 3/3).
- **PCWU/RFT/Type-Init PC Oral/LOFT/UPRT/EET/Other Time** - Record the total simulator time. Do not divide the time between PF and PM activities.
- **TO/LDG Landing Recency** - A minimum of 3 takeoff and landings which must include:
  - Takeoff and landing with a simulated failure of the most critical powerplant.
  - Landing from an ILS approach to the lowest manually flown ILS minimum authorized.
  - Landing to a full stop.
  - An autoland may not be counted as one of the 3 landings.

  Do not enter grading/status for any items. Check the "Satisfactory" or "Unsatisfactory" box; a grade of "Unsatisfactory" requires comments. Check the TO/LDG Recency Box. Record the time in "Other Training Time" box.
- **TO/LDG Landing Currency** - Complete the information areas including the number of takeoffs and landings. Check the TO/LDG Currency Box. Record the time in "Other Training Time" box. No items are required to be graded.
- **CAT II/III Check** – When a CAT II/III - PAR/PRM training qualification period is conducted independently of the PC/Type Rating, record the number of TO/LDG's, use "Other Training Time". Complete CAT II/III grading blocks.
- **Special Tracking** – Event will be directed by the Director of Training or Standards Captain.
- **QLOFT** (Qualification LOFT) – Check when a Qualification LOFT is conducted. Check "Complete" or "Incomplete". No items are required to be graded.
- **RLOFT** (Recurrent LOFT) – Check when RLOFT conducted in lieu of RFT. Check "Complete" or "Incomplete". No items are required to be graded.
- **Remarks** – Mark the box indicating that remarks have been included on the reverse side of the form. Remarks should be made for Incomplete, Unsatisfactory or Repeated events. Make remarks brief and specific, avoiding vague or unrelated comments. For example, for a repeated ILS approach due to inability to maintain glide slope, enter "deviation exceeded one dot." The remarks section is also used to note additional procedures e.g. special training at a specific airport.
- Nonstandard Flap Approach and Landing- Flight Safety Board required item. Non-standard flap approach and landing must be from a visual pattern initiated from a downwind with no PAPI or glide slope. A non-standard flap approach and landing is one which occurs with less than landing flaps.
- **767 LDS Diff. -** Check 767 LDS Diff. box. Check "Complete" or "Incomplete". No items are required to be graded.
- **CFD CURRENCY -** Check "Complete" or "Incomplete". No items are required to be graded.

REPEAT/GRADING/STATUS:

Proficiency Check Warm-up

- **CAT II/III** – CAT II/III certification must be graded by a Simulator Check Pilot (SCP). Use the PCWU column to record an S for Satisfactory or I for Incomplete and could not train to proficiency. Place a diagonal line (/) if not attempted. If not proficient or not conducted by a SCP then the CATII/III certification must be graded during the PC.
- **Non Appendix F Maneuvers** - use the PCWU column (Status) to record a "C" (Complete) for Non Appendix F maneuvers that are trained to proficiency. Record an "I" for maneuvers not trained to proficiency. Use a diagonal line (/) for maneuvers not observed. Do not use shaded repeat blocks. Non proficient items must be completed during the PC.

Proficiency Check – use the PC/RFT column (Status) to record an S - Satisfactory or U - Unsatisfactory. Required items not completed during the PCWU must be completed during the PC. Use a diagonal line (/) for maneuvers not observed.

- **Repeat** – Record an "X" if the maneuver was repeated. Only **ONE** repeat is allowed for each item. If the first attempt at the maneuver was unsuccessful, one repeat may be given after training in that maneuver has been accomplished. If the maneuver on the repeat attempt was unsatisfactory place a "U" in the status column. The number of items which can be repeated is a function of available time and the discretion of the check pilot. If there were no repeats, the repeat columns should remain blank. Do not use for Non Appendix F maneuvers as these maneuvers are to be trained and not checked.
- **Waived Items** - Mark any waived items (Indicated by★) with a "W" as applicable.

Recurrent Flight Training (RFT) – use the PC/RFT column (status) to record a "C" - Complete or "I" - Incomplete. Use a diagonal line for Non-Appendix F Maneuvers during the RFT.

PAR / PRM – Conducted during Initial Training as part of the CAT II/III qualification syllabus. Record a "C" - Complete or "I" - Incomplete to indicate status of training when conducted. A diagonal line (/) if not attempted or applicable.

Emergency / Abnormal Procedures – If any Emergency / Abnormal procedure is "Unsatisfactory" (PC) or "Incomplete" (RFT/RLOFT), identify by item number which procedure was graded as such in the remarks section with details on the item that was Unsatisfactory or Incomplete.

UPRT/EET – Check UPRT/EET box. Check "Complete" or "Incomplete". No items are required to be graded.

Seat Specific (CA) – Captain takeoff and landing conducted from the right seat. Record a "C" - Complete or "I" - Incomplete to indicate status of training when conducted. A diagonal line (/) if not attempted or applicable.

REMARKS / ADDITIONAL PROCEDURES:
